PROJECTS

Shopnest
ShopNest is an e-commerce full stack web application. The admin user can add new products where as the customer can explore products, add them to the cart as well as check out. The users need to register and login to access functionalities.

Tunehub
Tunehub is an online music application project focuses on developing a full-stack web application that allows to user to listing there own favorite music. The project leverages Java for its robust backend functionality, ensuring seamless data handling and server - side operations. The frontend, on the other hand, utilizes a combination of HTML, CSS and Thymeleaf template provided by Spring Boot, resulting in an engaging and user-friendly interface.

Portfolio
Designed and developed a dynamic personal portfolio using HTML, CSS, and JavaScript, serving as a showcase for my front-end development proficiency. The website features a responsive design, ensuring an optimal user experience across various devices. Interactive elements and animations were implemented to enhance user engagement, providing a comprehensive display of my web development capabilities

ACTIVITIES

- Developed an YouTube clone website using HTML and CSS.
- Creating an user friendly Portfolio to showcase my frontend skills.

CERTIFICATIONS

- Awarded certificates for proficiency in full-stack development technologies, including Java, Spring, Thymeleaf, HTML, CSS, and JavaScript.
- Awarded for successfully completing the Responsive Web Design certification from FreeCodeCamp, demonstrating skills in designing responsive web interfaces.
